Subject: Supporting the endoscopy services at Al-Awda Hospital – Al Nusirat

Dears at L'indipendente,

On behalf of Al-Awda Health and Community Association – AWDA, I would like to extend our sincere gratitude for your support and generous contribution of (€ 52,209).

We are pleased to inform you that this amount will contribute to cover the cost of a Laparoscope unit for Al-Awda Hospital in Al-Nuseirat, which will be procured from the local market (BoQ is enclosed). The addition of this vital equipment will significantly enhance our ability to provide diagnostic services and will contribute to improving the therapeutic intervention services, which are currently scarce and urgently needed.

For more than one year the laparoscopic services at Al Awda hospital have been completely halted due to equipment damage and the inability to secure spare parts as a result of the prolonged closure of border crossings. This has forced our surgical teams to postpone the procedure abdominal surgeries for cases that could have been managed more safely and effectively.

By providing this device, we will be able to restore these essential services, which are critical for improving diagnosis and recovery level adding to reducing surgical complications. On average, 50 patients per month are expected to benefit directly from these services once they are reinstated.

Given the ongoing emergency and the heightened pressure on Gaza's healthcare system, your support comes at a crucial moment. This intervention will not only ease the suffering of patients and the burden on overstretched Ministry of Health hospitals but also allow AWDA to deliver high-quality, health care services in a more timely and efficient manner.

Your support expresses your deep humanitarian solidarity with the people of the Gaza Strip - particularly its patients and the injured -amid the ongoing genocide war that has been waged against the Gaza Strip since 7th Oct. 2023.

Thank you once again for standing with us during these challenging times and for contributing to the resilience and sustainability of healthcare services in the Gaza Strip.

Best regards,

Rafat Al Majdalawi

General Director

Laparoscope unit
